Stock Drum Band Heaters

Silicon Rubber Drum Heaters are an excellent way to heat 55 gallon drums, 5 gallon pails, and other sizes of liquid containers. Various sizes and lengths allow you to heat up practically any drum, pail, or barrel. Uniform heat prevents scorching or degradation of the contents. The silicone rubber band should be placed below the level of the fluid. The easy to use spring lock-up allows movement of the band when liquid levels fluctuate. The band style heater can be used on plastic, steel, or almost any material.

Excellent to facilitate the flow of thick oils, greases, and other fluids in very cold environments.

The following sizes are stocked with a 6 ft. long SJO cordset. They can be ordered without a temperature control or with one of our fixed or adjustable thermostats.

Part No.	Application	Width	Length	Volts	Watts
SRD5-31-N	5 gallon pail	3	31	120	300
SRD5-41-N	5 gallon pail	4	31	120	550
SRD55-31-N	55 gallon drum	3	64	120	1000
SRD55-32-N	55 gallon drum	3	64	240	1000
SRD55-41-N	55 gallon drum	4	64	120	1500
